Dear Terry:

On behalf of the Airport Authority and myself, I would like to personally thank you for all your efforts on the Terminal Landside Expansion project. A project of this magnitude has many complex phases and your innovative ideas were invaluable. During the design we worked on phasing schemes that appeared to keep the pedestrian and vehicular traffic flowing smoothly. But during construction you were able to come up with a better idea at every phase. This caused even less disruption than we had planned and received many compliments from the traveling public.

We also appreciate the can-do attitude of both you and Jack Goodrum. The way you both responded to whatever situation arose at a moments notice was the kind of effort that is rare in the construction industry today. Thanks for making us all look good.

Sincerely,
